CONNECT EQUIPMENT. CONNECT PERSONNEL. CONNECT PROJECTS.

ONE PLATFORM. MULTIPLE APPLICATIONS.

SecureConnect is Seismic Source's secure communications and monitoring platform that connects field equipment, personnel, and project data through reliable cloud services.

CONNECTIVITY ANYWHERE

- CELLULAR**
4G / LTE / 5G
Reliable connectivity across vast areas.
- STARLINK BROADBAND**
High-speed, low latency internet for remote operations.
- SATELLITE COMMUNICATIONS**
Global coverage for the most remote locations.
- ETHERNET & WIFI**
Local area connectivity for base camps and command centers.

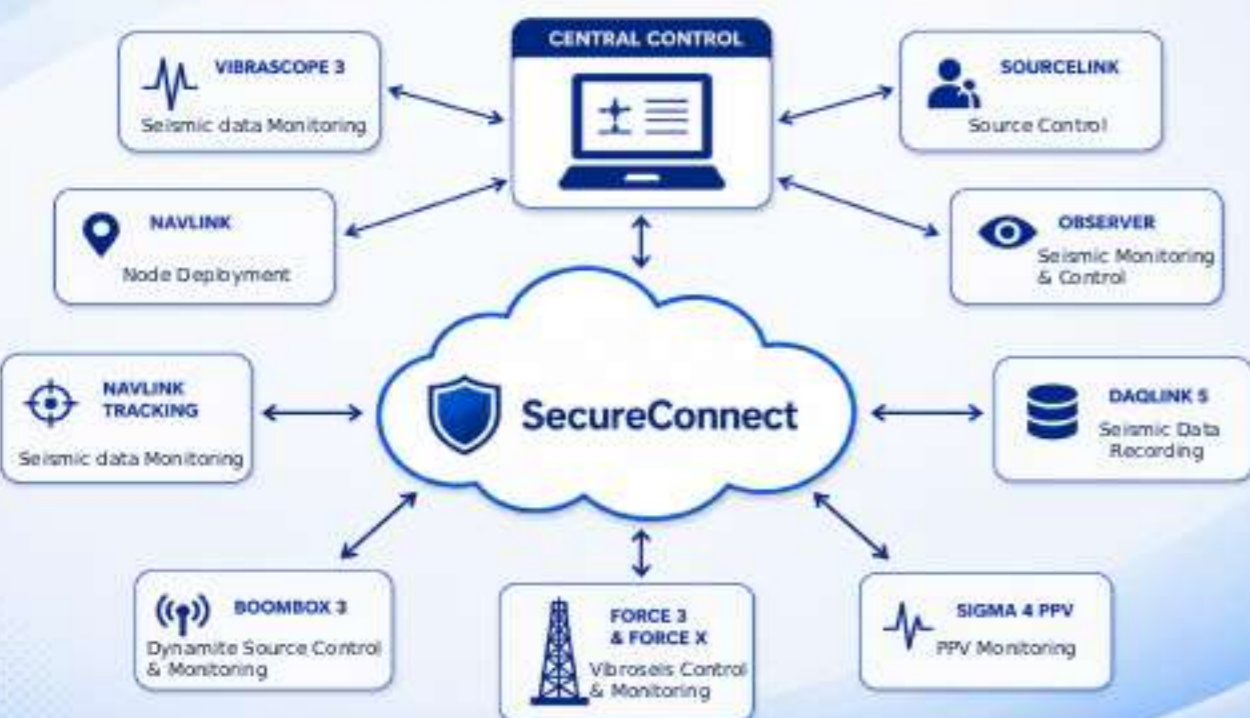

ONE CONNECTION. TOTAL VISIBILITY.

BUILT FOR THE FIELD

- SECURE**
End-to-end communications
- RELIABLE**
Designed for challenging environments and mission-critical operations.
- SCALABLE**
From a single device to thousands—securely connected.
- SUPPORTED**
Backed by Seismic Source expertise and responsive technical support.

MONITOR, CONFIGURE, AND MANAGE FROM ANYWHERE.

SECURECONNECT ENABLES:

- SOURCE OPERATIONS**
Control and monitor vibrators, blasters, and trigger systems in real time.
- MONITORING**
PPV, event detection, and continuous monitoring for safer operations.
- DATA ACQUISITION**
Remote data retrieval and telemetry from nodal and distributed systems.
- CREW MANAGEMENT**
Track crews, equipment, deployment status, and project progress.

SERVICE & SUPPORT

SecureConnect™ is delivered as a managed communications and monitoring service, providing customers with secure cloud connectivity, equipment integration, and ongoing technical support.

EACH DEPLOYMENT INCLUDES:

- ✓ SecureConnect account setup and provisioning
- ✓ Equipment configuration and integration
- ✓ Secure cloud hosting and communications services
- ✓ Software updates and maintenance
- ✓ Technical support and project assistance

A one-time setup fee covers initial system configuration and deployment.

FLEXIBLE SERVICE PLANS

Monthly service plans are tailored to the requirements of each project and may vary based on:

- Software applications utilized
- Equipment type and quantity
- Communications requirements
- Data volume and reporting needs
- Project duration

Whether supporting a single monitoring station or an enterprise-scale deployment, SecureConnect can be configured to match the needs of the project while providing reliable, real-time access to equipment, personnel, and data.
