

SEISMIC SOURCE COMPANY

# SECURECONNECT

Real-time, worldwide field communications  
for connected seismic operations.

CONNECTED  
Worldwide  
Internet  
Access

REAL-TIME  
Command,  
Status & Data

## WHAT SECURECONNECT DOES

SecureConnect gives seismic teams a real-time communications bridge between the field and the office. Instead of waiting for manual updates or on-site access, operators can monitor equipment, send commands, review status, collect data, and support crews remotely through an Internet-based hosted platform. It is designed for active seismic operations where source control, acquisition systems, deployment monitoring, PPV monitoring, crew management, and real-time QC all need to stay connected across changing field conditions and multiple project locations.

### KEY CAPABILITIES

- Worldwide Internet-based field communications
- Real-time command, status, and data messaging
- Field-to-office connectivity
- Remote equipment configuration
- Remote system status downloads
- Remote data harvesting
- Real-time deployment monitoring
- PPV and event monitoring support
- Multiple simultaneous projects and field systems
- Dedicated hosted account servers for security and project separation

### CONNECTED EQUIPMENT

- Force 3 Vibrator Controller
- DAQlink 5 Seismograph
- Boom Box 3 Dynamite Blaster
- UNODE 2 Seismograph
- Remote Trigger Module 3
- DX6 Distributed Seismograph
- Sigma 4+ Seismograph
- Bird Dog Units

### CONNECTED SOFTWARE

- SourceLink
- Data Collector 4
- Source Signature
- LineSetup
- Vscope 3
- Visualizer
- NavLink
- Event Monitor

## Field Crew, Operations and Management

## BENEFITS

- Connect field crews, management, and office systems from virtually anywhere with Internet access
- Improve operational visibility with real-time status and field data
- Reduce field support costs through remote configuration, monitoring, and data access
- Centralize source control, monitoring, navigation, QC, and acquisition management
- Support multiple projects, crews, and locations securely
- Scale from small monitoring deployments to large seismic acquisition crews

SECURECONNECT

#### GLOBAL ACCESS

Connect from  
virtual anywhere.

#### REAL-TIME CONTROL

Instant command,  
status & data.

#### OPERATIONAL INTELLIGENCE

Make better decisions  
with live insights

Connect your seismic field  
operations in real time with  
**SSC SecureConnect.**
